

Deployment billing ÖBRD – LOrg NÖ/W

Information for accident victims

This information is addressed to accident victims and interested people to explain how the billing system of the Austrian Mountain Rescue Service Provincial Organisation Lower Austria/Vienna (Österreichischen Bergrettungsdiens Landesorganisation Niederösterreich/Wien, or ÖBRD LOrg NÖ/W) works. The billing of deployments is an important source of income that allows the Austrian Mountain Rescue Service to subsist.

Flat-rate billing system (number of hours deployed per local unit)

The ÖBRD LOrg NÖ/W charges a rescue according to a flat-rate system. These hourly rates include all mountain rescuers and vehicles deployed, as well as the material used. There are three different flat rates that apply according to the intensity of the operation. Each flat rate depends on the costs and efforts linked to the operation.

Standard deployment 414 Euro / hour and local unit

This is an operation that can be handled by a medium-sized mountain rescue team.

Small deployment 170 Euro / hour and local unit

This is an operation with little expense and effort that can be accomplished by a small number of mountain rescuers.

For example: only one person to rescue; deployment on an easily accessible forest road; deployment on the slopes, etc...

Large deployment 828 Euro / hour and local unit

This is a very resource-intensive operation that mobilises more than one local unit.

Besides additional manpower, such an operation requires additional material expenses as well. This especially concerns large deployments (such as searches) and rescues that are particularly difficult and expensive.

Flat-rate surcharge for avalanche deployment 414 Euro / one-time

In case of an avalanche, between 6 to 13 units are automatically alerted; therefore, this type of deployment is very expensive and we must always charge a one-time surcharge. Billing is always based on one of the flat rates stated above.

Special billing

Special types of deployments can require a "special billing". These are non-standard special cases and are determined individually by the provincial office.

Deployment time

The deployment time is the time from receiving the alert up to the end of deployment of our rescue workers.

We always charge an hour at least. After that, every additional hour that was started for more than 30 minutes is rounded up and charged.

Deployment time 15 min > 1 hour charged

Deployment time 3 hours and 15 min > 3 hours charged

Deployment time 5 hours and 45 min > 6 hours charged

Animal rescue

The ÖBRD LOrg NÖ/W charges animal rescues and people rescues equally. The same billing flat-rates as above apply. In this case, we charge the owner.

Validity

This billing method applies to all deployments from 01.01.2020. The ÖBRD LOrg NÖ/W reserves itself the right to adapt these flat rates to the index.

Payment conditions

The attached invoice must be paid directly to the Austrian Mountain Rescue Service Lower Austria/Vienna, regardless of any possible assumption of the costs by an existing mountain rescue insurance.

The person rescued (or for minors, their legal guardian) receives an invoice. It must be paid immediately to ÖBRD NÖ/W and can then be submitted to an existing insurance provider (if the person has insurance coverage). Sponsors of the Mountain Rescue Service also receive an invoice that can be submitted to the respective provincial organisation (see next point).

Sponsor/supporting member

If you, your spouse or your life partner is a "supporting member" – with our mountain rescue insurance – you and children under 18 living in your household have access to rescue insurance that covers all rescue costs.

To process the claim, we need you to provide the following documents:

- The original invoices listing all costs incurred during the rescue (such as mountain rescue, slopes rescue, helicopter, etc.)
- A copy of the payment of the sponsor contribution as a confirmation of the transfer (payment confirmation/account statement)
- Social insurance number and name of your social insurance
- Contact information (phone number, e-mail address) where you can be reached
- Please also tell us whether you have taken out any other insurance that also covers rescue costs

If you are a sponsor of the Lower Austria / Vienna provincial organisation, or one of the 30 local units in Lower Austria / Vienna, please send the required documents for processing the claims to us by post at: Österreichischer Bergrettungsdienst, LOrg NÖ/W, Schelleingasse 26/2/2, 1040 Vienna.

If you wish to become a sponsor of the Mountain Rescue Service and benefit from the protection of mountain rescue insurance in future, you can do so by paying a sponsor contribution of at least 24 Euro. The rescue insurance covers search and rescue costs up to 25,000 Euro in case of emergency. Not only for you, but for your family too (spouse or life partner and children under 18 living in the same household)!

You will find the request form as well as more information on the ÖBRD homepage at <https://bergrettung-nw.at/jetzt-unterstuetzen/foerderer-werden>

Other information

Since in many cases, other existing rescue insurance may provide a complete or partial refund of rescue costs, we would like to let you know that members of alpine associations (such as: ÖAV, ÖTK, Naturfreunde, etc.) can have their rescue costs refunded by these organisations. Credit card holders (such as Visa, etc.) and members of automobile associations may also be insured against rescue costs, but the concrete insurance terms must be clarified with the credit card company, the alpine association or the automobile association directly.

ÖBRD LOrg NÖ/W consists of 1350 mountain rescuers who are on standby around the clock 365 days a year. The aim of our association is to aid, search and care for, rescue, and evacuate all victims of accidents, missing persons, sick people or people who are otherwise in need, regardless of their type of emergency or whether they are to blame for it, away from public roads on impassable alpine terrain. The revenue from deployment billing is used to cover the costs of operations as well as vehicles, mountain rescuer trainings, acquisition and maintenance of material and other administrative tasks.
